

Drive a high-tech learning environment with Nile

Nile delivers a complete and unified wired and wireless system as a service for your K-12 school.

64% of students feel the impact of unstable internet connection.

74% of teachers have digital game-based learning to enhance lessons.

Experience Secure, High-Definition Connectivity

Nile's network as a service is designed to deliver high-capacity wired and wireless everywhere.

- **RELIABILITY.** Built with high-end enterprise grade hardware, we provide an uninterrupted learning experience for students.
- **CAPACITY.** We deliver a WiFi 6 network that is ready for the multitude of digital applications.
- **COVERAGE.** We design your network to support the capacity and density of your school.

No Hassle, E-Rate Eligible Network as Service

It's time to welcome reliable, high-performance coverage and capacity to every classroom. Quick deployment and offloaded network management, Nile delivers K-12 schools with a network designed for seamless learning experiences.

Annually billed, we help eliminate high-upfront hardware costs that are compounded with unpredictable add-ons, such as security components and training requirements.

The increase in demand for a digital learning methods require an extremely reliable, high-performance network.

Today's classrooms are now high-tech learning centers that empower students to learn, collaborate, and solve problems. Traditional networks are not built for the influx of Chromebooks, tablets, and smartboards simultaneously accessing the internet for digital learning applications. Additionally, securing these minors' devices is a complexity. All this results in a lack of seamless connectivity that impacts learning ability, time, and cost.

Take the Work Out of the Network

From Day 0 thru Day N, Nile delivers your network completely as a service. Reduced complexities, out of the box security and simplified operations give K-12 the network they need. One that is highly- reliable, highly-secure, and incredibly simple.

- **ENGINEERED AROUND THE PRINCIPLES OF ZERO TRUST,** Nile eliminates unauthorized access and malware proliferation on your network, securing it for minors.
- **SOFTWARE UPDATES & SECURITY PATCHES** are automatically pushed onto your network without impacting uptime.
- **HARDWARE LIFECYCLE REFRESHES** are planned for and shipped out to you by Nile.
- **INTEGRATED AI** that constantly self-tunes network performance. *Never wait until it breaks.*

Teachers operated in spotty classroom coverage that had them planning for two lessons: one if there was connectivity, and one in case not. The Nile service resulted in full site coverage with seamless roaming and WiFi 6 capacity everywhere.

"Once Nile was installed, it was the first time that we didn't have connectivity issues."

Rochelle Perez, Computer Technology Teacher, St. Albert the Great Catholic School
