What is NaaS by nile?

Network as a Service (NaaS) by Nile delivers enterprise wired and wireless LAN connectivity completely as a service.

Networks are riddled in complexity.

Is NaaS right for you?

See why others are switching.

64% of organizations find network security harder to manage than two years ago.1

70%
want IT teams to work
on strategic initiatives
(versus reactive issues).2

300K
average cost of IT downtime per hour.3

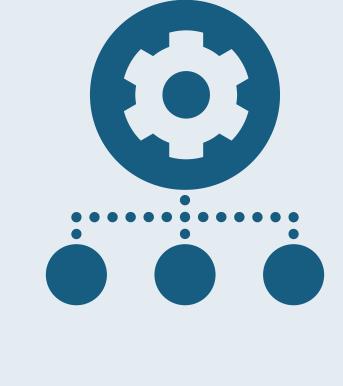

NaaS...

Brings cloud-agility to your campus network.

Secures your LAN with zero trust.

What's the Difference?

Vendor Dependent Software Upgrades

Complex and time-consuming updates are deferred leaving

the network more vulnerable to security breaches or

sub-optimal performance.

Life with NaaS by Nile **Today's Network Experience** DIY Included -aaS Plan Understand network technical requirements to meet Understand network technical business needs. requirements to meet business needs **Hire 3 Party Experts for Network Design** Included -aaS Design Execute a site survey and design as an additional cost. Custom network design **Overwhelming Equipment Options** Included -aaS Sift through lists of SKUs to select the right equipment, add-ons, **Procure** and features.
