

Top 10 Innovations for Primary Education

Empower Digital Classrooms

Nile delivers a complete wired and wireless network for schools, including day O/N services.

Designed for Today's Needs

Nile is an end-to-end system, eliminating complexities of the product centric deployments.

Eliminate Network Disruptions

A Nile network proactively resolves deviations in service quality for student and teacher devices.

Free Up IT Resources

A Nile network eliminates complexity out of day-to-day maintenance tasks with automation.

Protect the School Infrastructure

Nile prevents unauthorized access and malware proliferation across the school network.

Protect Student Data

Hardened elements with no local access, coupled with SOC-2 Type 2 compliant cloud service.

Network that self-improves

Software improvements for network functions are automatically deployed without downtime.

"Once Nile was installed, it was the first time that we didn't have connectivity issues."

- St. Albert the Great Catholic School

Automated Maintenance

Nile's software updates compare system wide performance before and after the upgrade.

Simple and Budget-friendly consumption

Nile is purchased as operational expense in one step, eliminating upfront capital requirement.

Share Responsibility for Student Success

Nile's service delivery and customer success teams are aware of issues before you are.

"With Nile, 90% of our IT tickets related to connectivity issues have disappeared."

- Cripple Creek-Victor School District

Visit nilesecu.re/primaryed to transform your school's network experience.
