

Top 10 Innovations for Digital Workplaces

Consumed in one simple step

Converges 10+ traditional products and services into one vertically integrated solution.

Agile innovation cycle

Built with modern cloud software principles for rapid innovation, scale, and simplicity

Elevate office connectivity

Industry-first performance guarantee for coverage, capacity and availability.

Predictable, not reactive

Proactively resolves issues that would result in network-related downtime.

Speeds up digital workplaces

Similar to cloud-first IT solutions. automates day -1/N lifecycle services.

Secured by default

Extends zero-trust principles to the network edge, isolating each mobile and IoT device.

Protects enterprise data

Utilizes hardened network elements coupled with SOC-2 Type 2 compliant cloud service.

"There are no spikes in capital expenses with Nile, or any chance of overpaying for OpEx. We simply pay per user or per square footage, and scale as we go."

- SparkCognition

Self-tuned and optimized

Network enhancements and hardware refreshes are automatically managed by Nile.

Eliminates capital expense

Per user / square footage pricing with monthly or annual billing, with no upfront capital.

Focused on outcomes

Enables IT teams to focus on business initiatives rather than network maintenance.

"Our cyber insurance carrier recently reviewed our network security. Due to the quality of the Nile network, they actually lowered our premium."

- SDI
