

Equipping IT Professionals with Practical Skills for the Future of Networking

Introduction

Imagine a scenario where IT teams can harness an intelligent, self-managed network, enabling them to channel their expertise toward driving business value. With AI and automation handling daily tasks, professionals are empowered to innovate and collaborate on revenue-generating initiatives.

You no longer have to imagine.

For the first time in the enterprise networking industry, the Nile Access Service integrates cloud-native software delivery, as-a-service consumption, zero trust security, service level guarantees, and AI networking into a single solution.

These elements combine to form the next-gen enterprise network, breaking away from the limitations of the past 30 years and revolutionizing the design, consumption, and operation of enterprise networks.

In this training and qualification program, you'll discover how Nile's innovative vision for modern network architecture enhances security and management while focusing on users, devices, and applications, surpassing traditional network architectures.

Badge Categories

The training you are about to receive is designed to teach proficiency in modern network deployments, no matter your level of experience. Nile offers three qualification badges, each providing unique insights into a different area of network design and operation.

Pioneer

For professionals focusing on network Design, Architecture, and Security, this badge provides a vendor-neutral overview of next-generation network architectures, cloud networking and terminology.

Trailblazer

Geared towards engineering and installation professionals, this badge covers site surveys, installations, and other field-specific skills, including how to use the Nile Nav mobile app to activate, configure, and troubleshoot Nile's cloud-native network elements.

Pathfinder

Designed to educate on cloud-native network operations, this badge ensures proficiency in operating Nile services and integrating them with third-party technologies like SIEM, ITSM, and various network vendors.

Cost & Commitment

Training and Exam Fees: Access to the Pioneer, Trailblazer, or Pathfinder training and quiz is \$99 per track.

Retake Policy: Includes up to three qualification quiz retakes; additional retakes will cost \$99 each.

Badge Validity: Each badge is valid for 2 years, necessitating re-qualification to maintain active status.

Benefits of Nile Qualification Status

- **Demonstrate your expertise:** Showcase your proficiency and understanding of next-generation network technologies.
- **Enhance your professional standing:** Elevate your credibility and reputation within the industry, gaining recognition as a knowledgeable expert.
- **Increase your efficiency:** Acquire the skills to implement technology efficiencies and enhance productivity in your role, driving improved performance and outcomes.

Promoting Badges

- Easily add digital badges to LinkedIn profiles, digital resumes, and email signatures, with tools for seamless verification and sharing.
- Share your success with your network on social media through one-click badge sharing, amplifying your professional milestones.
- Each badge includes a unique verification link that confirms your Nile-qualification status, accessible directly to employers and professional peers.

Get Qualified with Nile

Register today to begin your journey to becoming a Nile-qualified professional in next-generation networks. Propel your career to new heights by demonstrating your commitment to continuous learning and professional development.
