Secure Event Venue Networking

High-performance NaaS for high-density environments.

## Legacy Networks Impact User Experiences And Strain IT

Live venues rely on flawless connectivity for ticketing, payments, security, and social media apps. Any issues break transactions, expose risk, and lead to a poor user experience.

Top Challenges:

1.
Delivering high-performance connectivity during extreme realtime event-driven demands.

2.
Securing thousands of user-owned devices from threats in highly public environments.

3.
Ensuring operational systems like scanners and POS systems never fail during an event.

Nile's Secure NaaS Guarantees Performance And Unburdens IT

Nile delivers a secure NaaS with high-performance wired and wireless access, built-in Zero Trust, safe guest access, and autonomous operations—no manual tuning or per-event reconfiguration needed.

Nile Increases Network Reliability While Reducing Risk

Dependable Connectivity for High-Density Environments

High-speed wired and wireless connectivity without tickets and negative social media complaints.

Endpoint Security That Eliminates Well-known Attack Vectors

Built-in Zero Trust that contains malware, traffic snooping, rogue devices and lateral attacks.

Guaranteed Application Transaction Integrity

Autonomous operations ensure optimal performance and industry's only fianancially-backed guaranteed experience SLA.

Black Hat MEA Runs Flawless Network for 40K Attendees

Nile powered Black Hat MEA with secure, autonomous Network as a Service connectivity for more than 40,000 attendees and 450 exhibitors, delivering uninterrupted performance with zero network disruptions or security incidents.

> "We selected Nile as the secure connectivity provider after rigorous due diligence. Nile's Secure NaaS service performed flawlessly, delivering high-performance, secure connectivity and an excellent user experience in a highly demanding environment."

Nile Makes Experiences Memorable

Automated Event Day Performance Optimization

Autonomous operations optimize for crowd surges and traffic shifts, with no event-day tuning required.

The Industry's Only Secure Guest Access

Fans, attendees, travelers and visitors can share experiences without worrying about traditional security and performance issues.

Simple And Secure User/Device Group Isolation

Embedded access control, segmentation and policy enforcement ensure it's easy to enforce who and what devices can reach while connected.

Related Services

ACCESS · Nile Access Service

A robust, modern wired and wireless foundation that supports today's evolving indoor and outdoor connectivity demands.
