A Secure NaaS Built for Financial Services

Designed for resilience and security compliance.
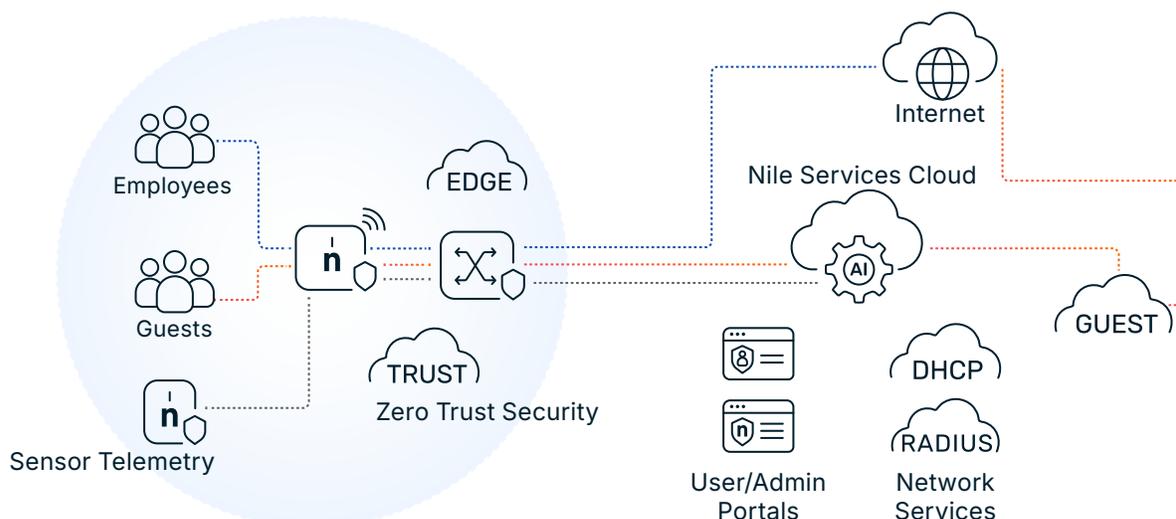

Legacy Infrastructure Fuels Security Risk

Financial institutions demand reliability, security, and resilience as digital services, cloud adoption, and regulatory scrutiny intensify—yet legacy networks require constant tuning and hands-on management, limiting agility and increasing operational risk.

Top Challenges:

1.
Ensuring continuous, reliable network access across all locations and services.

2.
Protecting against breaches and insider threats across wired and wireless networks.

3.
Managing regulatory requirements while juggling network complexity and manual IT processes.

Nile Increases Security And Simplifies Compliance

Nile secure Network-as-a-Service reduces operational risk in financial institutions by embedding Zero Trust controls, automating lifecycle management, ensuring deterministic performance, and eliminating manual configuration errors across environments.

Nile Increases Business Velocity While Reducing Risk

Unparalleled Network Performance for Time-Sensitive Transactions

High-speed wired and wireless connectivity without application lag and disruption.

Zero Trust Security Without Legacy Vulnerabilities

Built-in Zero Trust that contains malware, ransomware, insider threats and lateral attacks.

Autonomous Operations for Simplified Day 0, 1, 2 Management

AI and automation that reduces operational complexity for improved IT and business efficiency.

Financial Firm Scales Global Offices Without Expanding IT Team

As Carta expanded globally, it replaced legacy network constraints with a standardized, secure Nile deployment that eliminated performance complaints and reduced hands-on management, enabling growth without adding IT staff.

> "As Carta grew from 300 employees to 2,000, we did it without a dedicated network engineer. Because of Nile, we were able to provide global support and tackle new digital and security initiatives with an IT team of only seven."

> Director of IT, Carta

Nile Makes It Worth Your Business

Agentic-Ready Networking

Only performance-guaranteed SLA for rising "east-west" traffic as AI agents usage expands throughout financial services.

Zero Trust Cyber-Resilience

Hardened from the outside and isolated on the inside-Nile turns your network from a liability into your strongest line of defense.

Proactive Software Compliance

Nile's automated updates and modern network fabric close traditional software gaps, minimizing threats and possible regulatory fines.

Related Services

ACCESS

Nile Access Service

A robust and modern wired and wireless foundation that supports today's evolving indoor and outdoor demands.

Learn More >>

DHCP

Nile DHCP Service

Highly available cloud service for seamless and efficient IP Address operations in today's fast paced environments.

Learn More >>

TRUST

Nile Trust Service

Built-in Zero Trust at every level for secure access and threat protection, without complex add-ons.
