

# Healthcare-Ready Secure NaaS

Protect patient data. Keep critical systems running.

## Legacy Networks Put Patient Safety And Operations At Risk

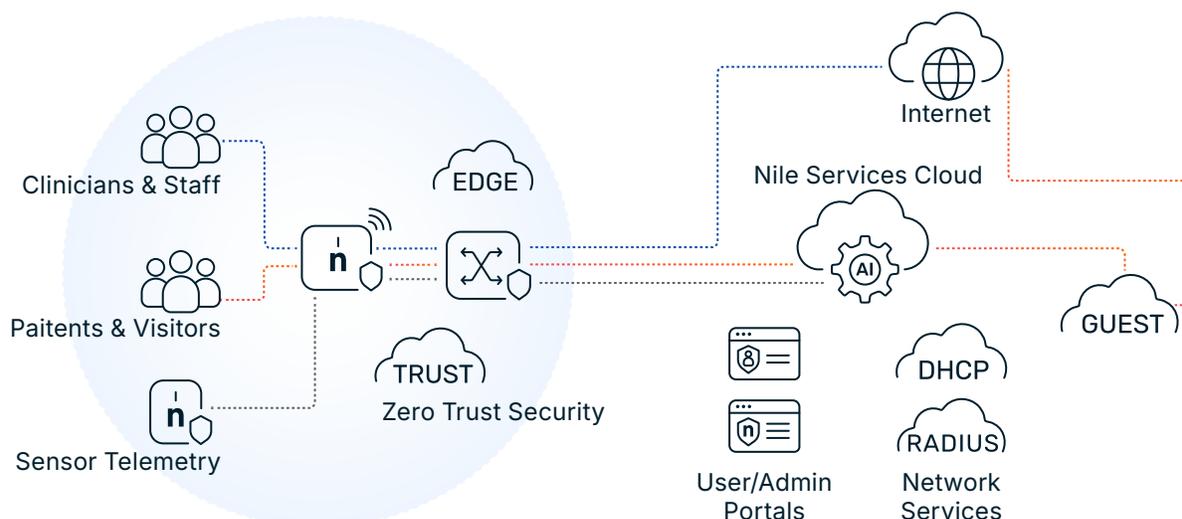

Healthcare networks face higher stakes where downtime, security gaps, and inconsistent performance don't just disrupt business—they delay care, break workflows, and erode clinician trust.

### Top Challenges:

- Controlling network access without disrupting care delivery and creating bottlenecks.
- Protecting patient data and clinical systems from cyber threats and ransomware.
- Maintaining availability and performance of critical applications and medical devices.

## Nile Delivers Secure, Modern Medical-Grade Networking

Nile's secure Network-as-a-Service reduces operational risk and protects critical systems across healthcare by providing deterministic access controls, ensuring performance, and eliminating legacy network vulnerabilities and security gaps.

# The Nile Experience Is Designed for Safer, Modern Healthcare

## Access Control Tailored To Clinicians, Staff, Patients

Controlled identity-based connectivity with proper privileges for every role.

## Proven Security Built For Strict Healthcare Standards

Comprehensive Zero Trust security designed to combat malware, IoT attacks, and data loss.

## Application and Device Performance, Guaranteed

Continuously optimized high-speed wired and wireless connectivity without application lag and disruption.

## Healthcare Organization Modernizes Network Without IT Overhead

As Tr1X expanded into a new facility, it deployed Nile's secure wired and wireless Network as a Service with built-in Zero Trust, enabling rapid rollout, isolated guest access, and autonomous operations without adding IT overhead.

**"The network just works. We don't spend time managing it, and we don't worry about security gaps."**

**Jonathan Perrin,**  
Co-Founder, Sr. Director of Operations & General Counsel

## Nile Differentiation

### Wi-Fi Designed For Roaming

Self-optimizing, seamless wireless without dropped voice calls and device failures across clinical environments.

### Unparalleled Medical Device Security

Medical devices and IoT placed into VLAN-free segments-of-one, continuously monitored, and ready for use.

### Industry's Only Secure Guest Access

Patient and visitor traffic designed to securely bypass all internal critical care data and devices.

## Related Services

### Nile Access Service

A robust, modern wired and wireless foundation that supports today's evolving indoor and outdoor connectivity demands.

### Nile Guest Service

Secure cloud-delivered guest solution with a new level of visitor security, that minimizes operational complexity.

[Learn More >>](#)

### Nile Trust Service

Zero Trust at every level for secure access, and malware and compliance protection, without complex add-ons.
