

# Campus NaaS Built For Today's Higher Education

Secure Connectivity For A Seamless Learning Experience

## Legacy Networks Strain IT And Hamper Learning

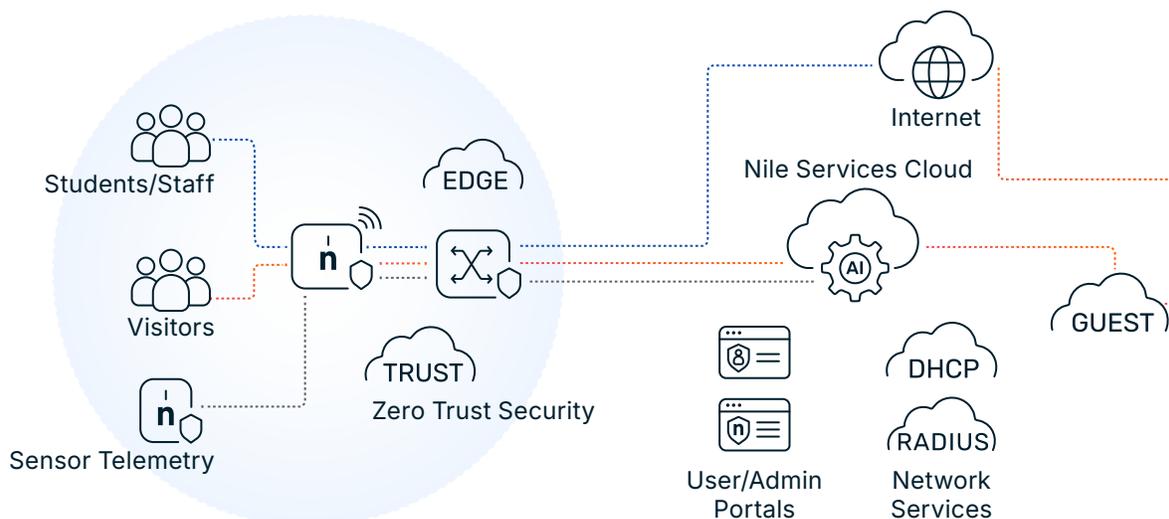

All higher-ed institutions face rising competition, modernization demands, and cost pressures, yet still rely on aging, legacy networks and complex operating models that hinder agility, increase expenses, and limit digital innovation.

### Top Challenges:

1. Providing seamless campus connectivity for students, staff, visitors, and IoT.
2. Securing all IT and OT devices, research systems, and student information.
3. Exceeding operational expectations — without impacting business priorities.

## Nile's Campus NaaS Simplifies Operations And Unburdens IT

Nile's secure NaaS delivers high-performance wired and wireless, mobility, seamless guest access, secure IoT onboarding, and automated operations—while enhancing security and reducing operational complexity across campus environments.

## The Nile Experience Is Tailored For Better Learning Environments

### Dependable Connectivity for Learning & Student Life

Fast always-on wireless and wired access for every user, device, and space.

### Proven Security Designed to Meet Strict Compliance Demands

Built-in Zero Trust for today's dynamic, high-density university environments.

### Relief For Overburdened IT Teams

Autonomous operations that reduce Day-2 and lifecycle tasks.

## Nile Helps Midwest University With Lean IT Reduce Outages By 67%

Within eight months of adopting Nile's Secure NaaS, Concordia University, St. Paul dramatically saw fewer roaming and connectivity disruptions, enabling it to improve the student and staff experience, and cut down help desk tickets.

**"We're a school, not a tech company with a large IT team. We need to provide reliable network connectivity that students can rely on without having to bring in-house expertise just to maintain evolving expectations."**

**Jonathan Breitbarth,**  
Director of Computer Services at Concordia University

## Nile Makes It Easy

### Wi-Fi Coverage Without Trouble Tickets

Self-optimizing wireless automatically eliminates "dead zones" in lecture halls, libraries, classrooms, dorms and labs.

### Simple And Secure BYOD/IoT Onboarding

Easy-to-use MyNile portal lets students onboard personal devices without complex NAC tools and IT involvement.

### The Industry's Only Secure Guest Access

Parents, visiting professors and athletes, and students can work or play without worrying about traditional security and performance issues.

## Related Services

### Nile Access Service

Robust and modern wired and wireless network that supports today's evolving indoor and outdoor connectivity demands.
