

Zero Trust in the Real World: 1M+ Attacks. Zero Breaches.

At Wild West Hackin' Fest, 100+ security pros threw more than 1 million attacks and probes (Nmap, Nessus, Metasploit, you name it) at Nile's Zero Trust Fabric. Result: zero breaches.

This wasn't a staged lab setup. It was a live, standardized enterprise LAN where native per-device isolation + Layer 3 segmentation shut down every attempt.

Customer Proof: Simpler IT, Stronger Security, 20% Savings

The City of Brentwood (TN) runs critical services for 45,000+ residents with a lean team and was managing a complex environment (nearly 250 switches and 75 VLANs).

They adopted Nile to reduce management burden, strengthen security, and drive measurable savings, ultimately seeing 20% cost savings and a shift from reactive firefighting to proactive operations.

On the Ground at Gartner IOCS 2025

We just wrapped Gartner IOCS in Las Vegas! We had great conversations, sharp questions, and real momentum around what enterprise teams want next: fewer tools, less noise, and networks that stop demanding constant babysitting.

2026 Outlook: The LAN Becomes the Security Control Point Again

Shashi Kiran's Top 5 Predictions for LAN Security in 2026 reinforces what we're seeing everywhere: Zero Trust becomes foundational, legacy complexity becomes the liability, and the LAN moves back to center stage as offices re-populate and device counts explode.

Inside Nile: 5th Annual Hackathon Highlights

R&D energy was high this month! The Nile engineering team got hands-on, tested ideas fast, and shared some great behind-the-scenes moments.

Co-Founder and CDO Sri Hosakote said, "Our engineering teams took the task head-on with a 24-hour innovation sprint. The goal – make the world's best secure NaaS offering – more reliable, more intelligent, more secure and importantly – more delightful to consumers! Engineers tackled everything from AI-driven triangulation tools, to speeding up software delivery with high potency, to reducing mean time to detect, triage, and resolve."

100% Uptime at the Global Health Exhibition

When the world shows up, the network can't slow down. At the Global Health Exhibition, Nile partnered with solutions by stc and TAWAL to deliver AI-driven secure connectivity for 100,000+ attendees and 2,000 exhibitors across 15,000 square meters. Four days. 24 TB of daily traffic. 100% uptime.

That's not "good performance." That's survivability at scale.
