

Secure Wired and Wireless Connectivity

High-Performance Networks Built With Zero Trust

Next-Gen Campus And Branch Networks

A modern solution for accelerating digital transformation initiatives, delivered-as-a-service.

Nile's Leading-Edge Differentiation

1.

Enhanced Risk Mitigation

Segment-of-one isolation, encrypted tunneling and built-in access control.

2.

Integrated Zero Trust Security

A layered approach with impenetrable infrastructure, malware avoidance and behavior verification.

3.

Always-On Network Assurance

Continuous performance monitoring with automated remediation that requires no IT intervention.

4.

AI-driven Autonomous Operations

Hardware, software updates, patches, and tuning included and performed as needed.

5.

Built-in Performance Guarantee

Industry's only financially-backed guarantee based on outcomes, not best-effort hardware SLAs.

6.

Subscription-Based Delivery

A true as-a-service model with no hidden complexity—for a complete, turnkey network.

Nile Offers Unmatched IT And Business Advantages

Unparalleled Security

Built-in Zero Trust secures everything from internal assets and data, to mobile devices and on-premises IoT/OT without traditional add-ons.

Full Day 0 to Day 2 Autonomous Operations

Enhanced AI and automation replaces "AI-assisted Guidance" with new levels of efficiency, performance and uptime.

Predictable Cost Savings

Subscription simplifies budgeting, reduces overhead, and aligns spending to ongoing operational objectives.

Clari Selects Nile For Operational Simplicity And Peace Of Mind

Fast-growing company with lean IT chooses secure NaaS and autonomous operations to maintain growth and business demands.

"The Nile Access Service has made a huge difference for our entire organization. It's a secure, high-performing wired and wireless service, with white-glove support that has changed expectations and how we operate."

Marcus Chan,
IT Operations Mgr. at Clari

Nile Delivers Secure, Autonomous Networks With Predictability

- 1 The world's most secure network. Delivered-as-a-service.
- 2 Autonomous real-time network performance optimization.
- 3 Consolidation of services eliminates complexity by up to 60%.

Nile Makes Deploying Wired And Wireless Networks Easy

1.

Predictive or on-site surveys trigger AI automated Bill-of-Material and Digital Twin creation.

2.

All necessary Nile infrastructure and accessories drop shipped and ready for installation.

3.

Clearly defined steps with verification checks ensure deployments are production-ready in record time.

Related Services

Nile Trust Service

Built-in Zero Trust security at every level that delivers secure access, malware protection and compliance protection.
