

Secure NaaS for Warehouse Operations

Secure, always-on connectivity for picking, packing, and shipping.

Operational Bottlenecks and Lost Productivity

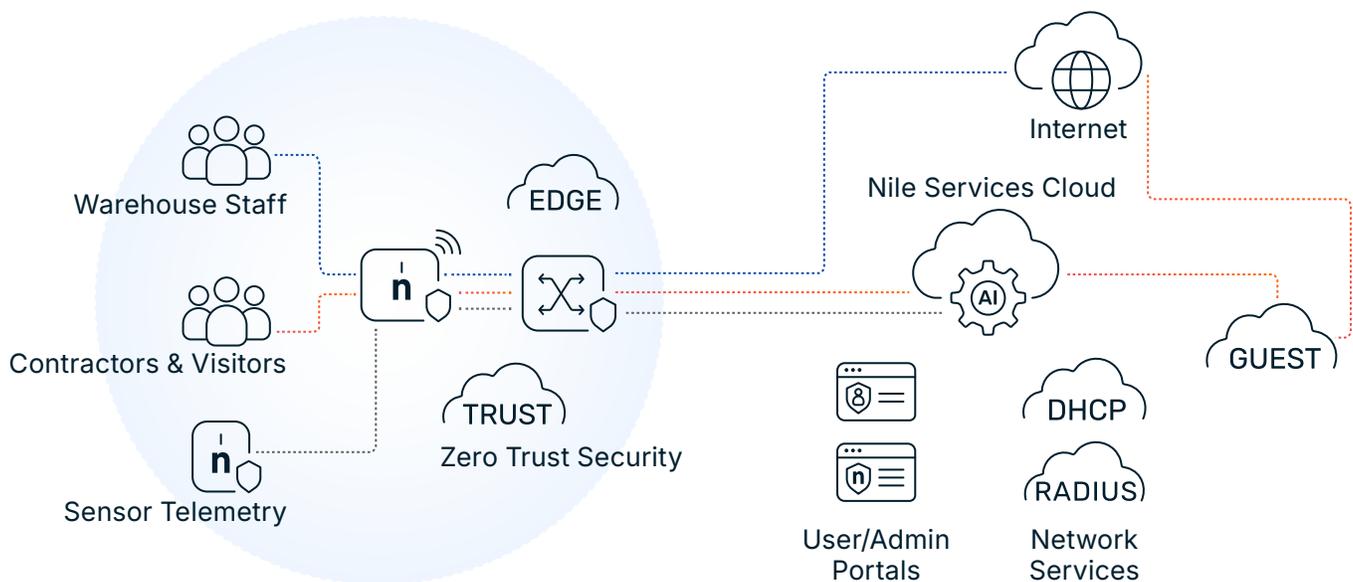

Warehouse operations rely on seamless connectivity for orders, scanning, inventory, and shipping. Instability and security gaps create costly disruptions, operational blind spots, shipment delays, and measurable productivity loss.

Top Challenges:

- Always-on connectivity for mobile workers, scanners, and dock operations.
- Network reliability that prevents operational downtime across warehouse floors, docks, and yards.
- Consistent performance and security across warehouses without increasing IT headcount.

The Nile Solution for Warehousing

Nile's secure NaaS simplifies operations, cuts risk, and delivers high-performance wired and wireless for mobile, AI, and warehouse apps, with built-in Zero Trust and advanced services—DHCP, RADIUS, WAN—without additional appliances.

Where Nile Delivers Immediate Impact

Operations Keep Moving

Scanners, tablets, and automation systems are always connected—so picking, packing, and shipping never stall.

Reduces Business Risk

Built-in Zero Trust contains threats instantly, preventing security incidents from disrupting operations.

Enables Multi-Site Growth

Autonomous operations deliver consistent performance across warehouses without increasing staff or complexity.

Logistics Company Eliminates Wi-Fi Complaints at New Warehouse

ReMarkets deployed Nile and went live in 30 days, delivering consistent warehouse-wide connectivity with zero Wi-Fi complaints and freeing IT to focus on higher-priority business needs.

“We haven’t had a single complaint or concern raised about the Wi-Fi from anyone on the factory floor. Additionally, the shift to a NaaS solution has greatly improved our ability to address more critical business requests.”

John Buller,
Technology Director, ReMarket

Nile Differentiation

Operational Risks Eliminated

Autonomous operations continuously correct faults and optimize connectivity to keep warehouse tasks running smoothly.

Security Without Disruption

Default Zero Trust containment prevents security events from slowing or stopping warehouse activity.

Guaranteed Performance

Consistent, guaranteed performance across warehouses without manual tuning, added staff, or operational uncertainty.

Related Services

Nile Access Service

Robust and modern wired and wireless network that supports today's evolving indoor and outdoor connectivity demands.
